

MICRO-SERIES ERGONOMICS & PERFORMANCE

Perfect balance and handling, exceptional power and control, uniquely versatile.

The Micro-Series micromotors, contra-angles and handpieces redefine the standards for dental instruments.

The Bien-Air Micro-Series brings together new LED micromotors and the new generation of ultra-short contra-angles and handpieces. The result is a combination which is up to 30% shorter and 23% lighter than previous generation models, while still offering the power and control of the best electric micromotors on the market.

The best performance / ergonomics / price-ratio on the market, the best of Bien-Air.

MICRO-SERIES INSTRUMENTS

The new Bien-Air Micro-Series contra-angles and handpieces offer you the very best in terms of grip and balance, guaranteeing more precise control and less fatigue at the end of the day. Why? Simply because they are shorter and lighter. Despite this, they are still as ultra-precise, reliable and quiet as conventional models.

MX2 MICROMOTOR THE LITTLE PRODIGY

The MX2 brushless micromotor, with adjustable LED light, is Bien-Air's latest little prodigy. Despite its compact size, it offers the same performance as the famous MX micromotor: power, versatility (at low speed), and perfect control of the speed, torque and reversing the direction of rotation, features which have earned Bien-Air its place as the uncontested leader in dental micromotors. Another key feature of the MX2 is its soft, more natural LED light with adjustable intensity. Thanks to its lifetime-lubricated ball-bearings, the MX2 is a maintenance-free sterilizable micromotor which offers further improved standards of hygiene and ease of use.

The Micro-Series instruments are compatible with Bien-Air's new short nose motors.
