

Bien-Air designed the first ever reliable turbine, marking the first of many revolutionary innovations: The first push-button bur change mechanism, air bearing technology, the first quick-connect coupling connection, the dual multi-strand optical glass conductor... to name just a few. These technological advances have always helped to make our turbines unique.

Paying careful attention to professionals, Bien-Air has met increasing challenges. A true culture of excellence sitting perfectly with the tradition of Swiss-Made products from the renowned Watch Valley.

TURBINES EVOLU -TION 2013

MORE EFFECTIVE INTERVENTIONS

GUARANTEED COMFORT AND TIME SAVINGS

AN INTELLIGENT INVESTMENT

The 2013 generation of Bora & Prestige turbines is the result of ingenious work, driven by an ongoing quest for excellence. Our turbines have been further optimised to ensure you benefit from the most advanced technology and the most refined ergonomics.

Bien-Air turbines: A perfect union of form and function for procedures of unprecedented efficiency and comfort.

CHUCK MECHANISM

Noise and vibrations are reduced thanks to our new chuck locking system.

PUSH-BUTTON

The Soft Push push-button has been further optimised to provide a quicker and easier tool change.

LIGHT

The light intensity has been almost doubled thanks to brand new technology: hot-pressed multi-strand optical glass.

BALL BEARINGS

Quiet and precise, with a long service life. Superior quality ceramic ball bearings.

ERGONOMICS

The perfect balance of cutting-edge technology and exceptional ergonomics.

DESIGN

Superior materials and pure lines are used to create sublime instruments.
